

JSU Automation Suite for Jira Workflows - Cloud Version

JSU for Jira Cloud

This is the documentation of JSU for Jira Cloud. If you are using JSU on Jira Server or on Jira Data Center, you can find the documentation [here](#).

The JSU app contains a range of useful features that enhance Jira's base functionality.

Just set it up and automate Jira workflows at super speed with absolutely zero coding.

Former JIRA Suite Utilities.

JSU features include new custom fields, enhancements to the Jira workflow (new conditions, validators, post-functions) and a new 'Transitions' tab on the View Issue screen.

JSU is also packed with powerful pre-conditions for post-functions that cannot be found in other apps.

The original version of this app was written by Gustavo Martin. Since 2011 it is maintained, improved & extended by [beecom](#).
